Keeping Your Vehicle on the Road Longer for Less!

The Precision is Within

Quality Beyond Your Expectations

Each and every JASPER Associate/Owner is committed to providing you with the perfect product. Our proven processes and quality control systems provide you with the very best quality in the industry. We dedicate ourselves to producing quality components that will meet or exceed the expectations of all of our customers.

State-of-the-Art Remanufacturing

When it comes to remanufacturing differentials and rear axle assemblies, JASPER sets the standard, remanufacturing to like-new specifications. Our state-of-the-art remanufacturing processes allow us to remain firmly on the cutting edge of remanufacturing.

JASPER's Process

Your Guarantee of Quality & Reliability

- Axle end remanufacturing for up to 1 1/2 tons is available during the remanufacturing process. Exact dimensional specifications and axle alignment are maintained.
- Inspection for correct backlash clearance is performed to assure proper gear lubrication for reduced noise and to avoid overheating, especially in severe-duty applications.
- Ring and pinion tooth contact pattern is precisely inspected and adjusted for both drive and coast sides. This ensures utilizing the full structure of the gear. JASPER's optimum tooth contact adjustment results in minimum gear noise and reduced fatigue.
- Skilled technicians assemble all differentials with a standard set of new parts including bearings, gaskets, seals, thrust washers and O-rings. JASPER also replaces the majority of ring and pinion gear sets for not meeting our strict tolerances.
- Bearings are preloaded to OEM specifications for longer bearing life, smooth operation and proper break-in. JASPER maintains a complete inventory of spacers and shims to ensure accurate preload settings and backlash which are so important to differential and axle assembly life.
- JASPER now offers an additional line of Differential Products (call for availability).
 - 7.25 AWD and 4WD Actuators
 - Wheel Bearing Kits
 - Axle Shafts

JASPER's People

From Identification to Installation We Have the Answers

- Install JASPER with confidence. JASPER differentials and rear axle assemblies are backed by our 3 Year/100,000 Mile Nationwide Warranty. A full warranty disclosure is available at www.jasperengines.com.
- Our friendly, courteous and knowledgeable sales staff, local area representatives and inside support team are available to consult with your installer regarding your needs and to provide answers to pricing and availability questions.
- A Technical Hotline (800-827-7455), with 24/7 emergency warranty information and a Premium Service Plan are also available.

Built with Quality Products from

- All threaded bolt holes are thoroughly cleaned to remove contaminants and eliminate a chance of cross threading which can lead to improper torquing. Differentials receive a final agitated wash to remove any possible contaminants prior to assembly.
